EDUCATION

Faculty of Computers and Information

Bachelor's Degree in Computer Science (Very Good with Honor)

Tanta, Egypt

September 2019 - July 2023

Digital Egypt Builders Initiative (DEBI)

AI and Cloud Computing

Cairo, Egypt

January 2024 - Present

TECHNICAL SKILLS

Programming Languages: PHP, Python, JavaScript, C++ , TypeScript

Development: Frontend: React Native, HTML, React Hooks, Redux.js, Axios; Backend: PHP, JSON, OOP

Databases: MySQL, SQL

Machine Learning: Machine Learning, Data Structures, Web Scraping

Version Control & Tools: Git, Docker

WORK EXPERIENCE

Full Stack Developer

Camp Coding

Tanta, Egypt

July 2022 - Present

- Designed and developed mobile applications for iOS and Android using React Native, creating intuitive and responsive user interfaces.
- Managed backend development with PHP, implementing secure, scalable APIs and server-side logic.
- Ensured cross-platform compatibility and optimized performance for seamless user experiences.

AI Engineer Intern

National Bank of Egypt

Cairo, Egypt

June 2024 - Present

- Led development of a financial dashboard product to process uploaded financial images and generate summaries and narratives.
- Developed backend logic to extract and analyze financial data, enhancing user understanding of financial insights.

PROJECTS

- **LaserJet (Play Store):** Developed a React Native e-commerce app with Mini Money service for purchasing household appliances and electronics in Egypt. Integrated product search, filtering, and installment payment features, including credit limit tracking and automatic payments. Built secure backend APIs with PHP and MySQL to manage product catalogs, user transactions, and logistics for next-day delivery across Egypt. Implemented real-time offer updates and branch pickup options for enhanced user convenience. [Play Store](#)
- **Camp for English (Play Store & App Store):** Developed a cross-platform educational mobile application using React Native to facilitate English language learning. Integrated multimedia resources (PDFs, videos) and interactive tests to enhance comprehension. Implemented real-time notifications and daily motivational posts to boost user engagement. Designed and managed backend APIs with PHP and MySQL for seamless content delivery and online session scheduling. Ensured secure data handling and optimized performance for a user-friendly experience. [Play Store](#) [App Store](#)
- **Anglo Academy (Play Store & App Store):** Built a cross-platform educational app using React Native for law students at Cairo University's English section. Integrated video lectures and interactive exams to track student progress. Developed backend APIs with PHP and MySQL for secure content delivery and real-time performance monitoring, ensuring an engaging and efficient learning experience. [Play Store](#) [App Store](#)
- **Dr Saged Loai (Play Store & App Store):** Engineered a React Native-based educational app for dentistry students, featuring video lectures, summaries, and interactive exams. Implemented solved exam modules with video explanations for enhanced learning. Developed backend with PHP and MySQL to manage content and track performance metrics, including success and failure rates, ensuring a robust learning platform. [Play Store](#) [App Store](#)
- **El-Zatona (Play Store & App Store):** Developed a free educational app using React Native for geography and GIS studies. Integrated lectures, summaries, and a blog for article sharing and commenting. Implemented interactive tests and live lecture scheduling, with backend APIs in PHP and MySQL for seamless content delivery and user interaction. [Play Store](#) [App Store](#)

- **El-Feky Center (App Store):** Created a React Native educational app for dental students, featuring videos, quizzes, PDFs, and a community platform for knowledge sharing. Developed secure backend APIs using PHP and MySQL to manage content and user interactions, optimizing for scalability and user engagement. [App Store](#)
- **Kidzinia (Play Store):** Built a React Native app to track children's daily activities and progress in kids' centers. Integrated detailed teacher reports and real-time updates, with a PHP and MySQL backend for secure data management and seamless parent-teacher communication. [Play Store](#)
- **Akadimia Shehata (Play Store & App Store):** Developed a cross-platform app using React Native for law students, offering video lectures and exams for progress tracking. Implemented secure backend APIs with PHP and MySQL to ensure efficient content delivery and performance monitoring. [Play Store](#) [App Store](#)
- **Skillify Education (Play Store & App Store):** Engineered a React Native app for medical and secondary students, featuring educational videos, quizzes, PDFs, and a community platform. Developed backend with PHP and MySQL for secure content management and user interaction, enhancing learning outcomes. [Play Store](#) [App Store](#)
- **Frqan (Play Store & App Store):** Developed a React Native real estate app with AI-powered property matching, interactive maps, and real-time updates. Integrated features like price drop notifications, premium listings, and neighborhood insights. Built backend with PHP and MySQL for secure data handling and seamless user experience. [Play Store](#) [App Store](#)
- **ZYMedicine (App Store):** Created a React Native app for surgical medicine education, featuring video lectures, summaries, and interactive tests with solved exam modules. Developed backend APIs with PHP and MySQL to manage content and track user performance, ensuring an effective learning platform. [App Store](#)
- **Enjoy Pharmacology (App Store):** Built a free React Native app for high school biology students, supporting tablet-based exams. Integrated electronic assignments, auto-corrected tests, and performance tracking tools. Developed backend with PHP and MySQL for curriculum management and detailed progress reports. [App Store](#)
- **SaeedAdel (App Store):** Developed a React Native app for medical students, offering video lectures, summaries, and interactive tests with solved exam modules. Built backend with PHP and MySQL to manage content and track performance, enhancing user learning experience. [App Store](#)
- **xDeposit (App Store):** Engineered a React Native app for medical education, providing high-quality curricula with video lectures and summaries. Developed secure backend APIs using PHP and MySQL to ensure efficient content delivery and user engagement. [App Store](#)
- **MR.Diet (App Store):** Created a React Native app for health and diet tracking, offering personalized meal plans and daily progress monitoring. Integrated motivational features and secure backend APIs with PHP and MySQL for seamless data management and user support. [App Store](#)
- **EMTYAZ (Play Store & App Store):** Developed a free React Native app for legal studies, featuring lectures, summaries, and a blog for article sharing. Integrated interactive tests and live lecture scheduling, with backend APIs in PHP and MySQL for efficient content delivery. [Play Store](#) [App Store](#)
- **Smart Fish Farming Track System (IoT) - Graduation Project:** Developed an IoT system using Arduino and sensors (oxygen, temperature, water level, turbidity) to monitor and send real-time data to a mobile app for fish farming management.
- **Dr-matary (Play Store & App Store):** An educational app for medical students with real-time challenges, videos, questions, podcasts, Zoom integration, and secure content. [Play Store](#) [App Store](#)
- **TS Academy (Play Store & App Store):** A secure educational app for law students with videos, questions, posts, and PDFs. [Play Store](#) [App Store](#)
- **ACash (Play Store):** An app facilitating transactions between electronic banks, local wallets, and global payment systems. [Play Store](#)
- **i4Technology (App Store):** A smart home control app using MQTT for real-time device management. [App Store](#)
